OAK Management, Inc. is a growing small business focused on providing our clients with innovative solutions in the areas of program management, systems engineering and software development services. Our corporate client base includes project offices in the Department of Defense, Department of Commerce and commercial shipbuilding industries. OAK Management, Inc. supports our National Oceanic and Atmospheric Administration (NOAA) and Naval Sea Systems Command (NAVSEA) clients in program management and engineering disciplines for shipbuilding concept exploration, ship machinery and systems design, functional integration, acquisition and ship life cycle engineering management.

Position Title: NOAA Project Manager

Duties: Provide supervision and technical support for the NOAA FSV (Fisheries Survey Vessel) project as well as other current and emerging work under various support contracts. Proactively work to identify emerging requirements and issues as well as to develop the relevant support plans. Effectively work with multi-disciplined projects/teams that may include Government, subcontractors and subordinates. Must be willing to and capable of performing requirements development, analysis of alternatives, design reviews, tradeoff studies, engineering analyses, and other technical and programmatic functions as necessary. Effectively interface with ABS, USCG and other regulatory agencies. Responsible to the Systems Engineering Director to meet program objectives.

Minimum Essential Education: Bachelors degree in naval architecture and/or other relevant engineering discipline required, PMP or equivalent certification highly desired.

Minimum Essential Experience: At least fifteen years overall experience supporting Government contracts in marine environments. Prior experience as program/project manager highly desired.

Essential Skills/Capabilities: (1) Must lead by example. (2) Must be able to build strong relationships with clients based on mutual respect and trust. (3) Must be able to deal successfully with ambiguities and unknowns. (4) Must be able to recognize business development opportunities and respond quickly. (5) Must be able to oversee and direct successful management of multiple disparate projects simultaneously. (6) Must be able to personally lead high visibility projects to a successful completion.

Professional Licenses/Certifications: PMP certification (or equivalent) is highly desired.

Work Location: Primary: Marinette, WI with occasional visits to Silver Spring, MD or other locations as needed.

Travel Requirements: Occasional, short duration

Security Clearance: Ability to obtain a government security clearance is required, active clearance desired. No visa sponsorships available.
